

20X Speed Line Level & Transit-Level

54-190B

For builders that require rough angle turning and fine tuning adjustments. These instruments have clamps and tangents that bring your instrument quickly on target. 15 minute horizontal circle on both models and 1° vertical arc on Model 200B allow the builder to set rough angles. Units use 1/2 x 20 thread.

54-200B

- Non-strip focus knob prevents breakage and lens damage
- Built-in sunshade reduces glare
- Large achromatic coated objective lens for a sharp image
- Rubber eyepiece cap protects eyeglasses
